Easy Origami Turkey

Simple step-by-step paper folding art. Ages 4+ (6+ alone)

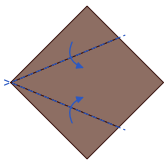

Watch the folds

1 Get a square

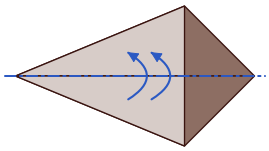

Use a 15 cm (6 in) square, colored side up. Turn it so a corner points up, like a diamond.

2 Make the kite

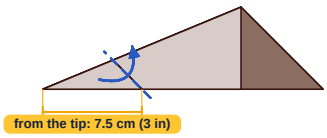

Crease the diamond corner to corner and open it. Fold both left edges in to that line.

3 Fold it in half behind

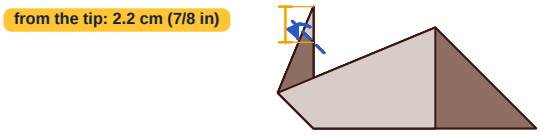

Fold the kite in half along the middle line, with the bottom half going behind.

4 Fold the neck up

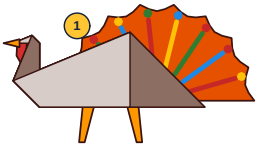

Make a slanted fold 7.5 cm from the left tip, and push the tip up inside. This is the neck.

5 Fold the head down

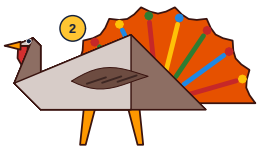

Make a small slanted fold 2.2 cm from the top of the neck, and push the tip down inside. This is the head.

6 Glue on the beak, wattle, tail and legs

Cut out the beak, wattle, tail fan and legs from the pieces page, with a grown-up helping, and glue them on.

7 Draw the eye and wing

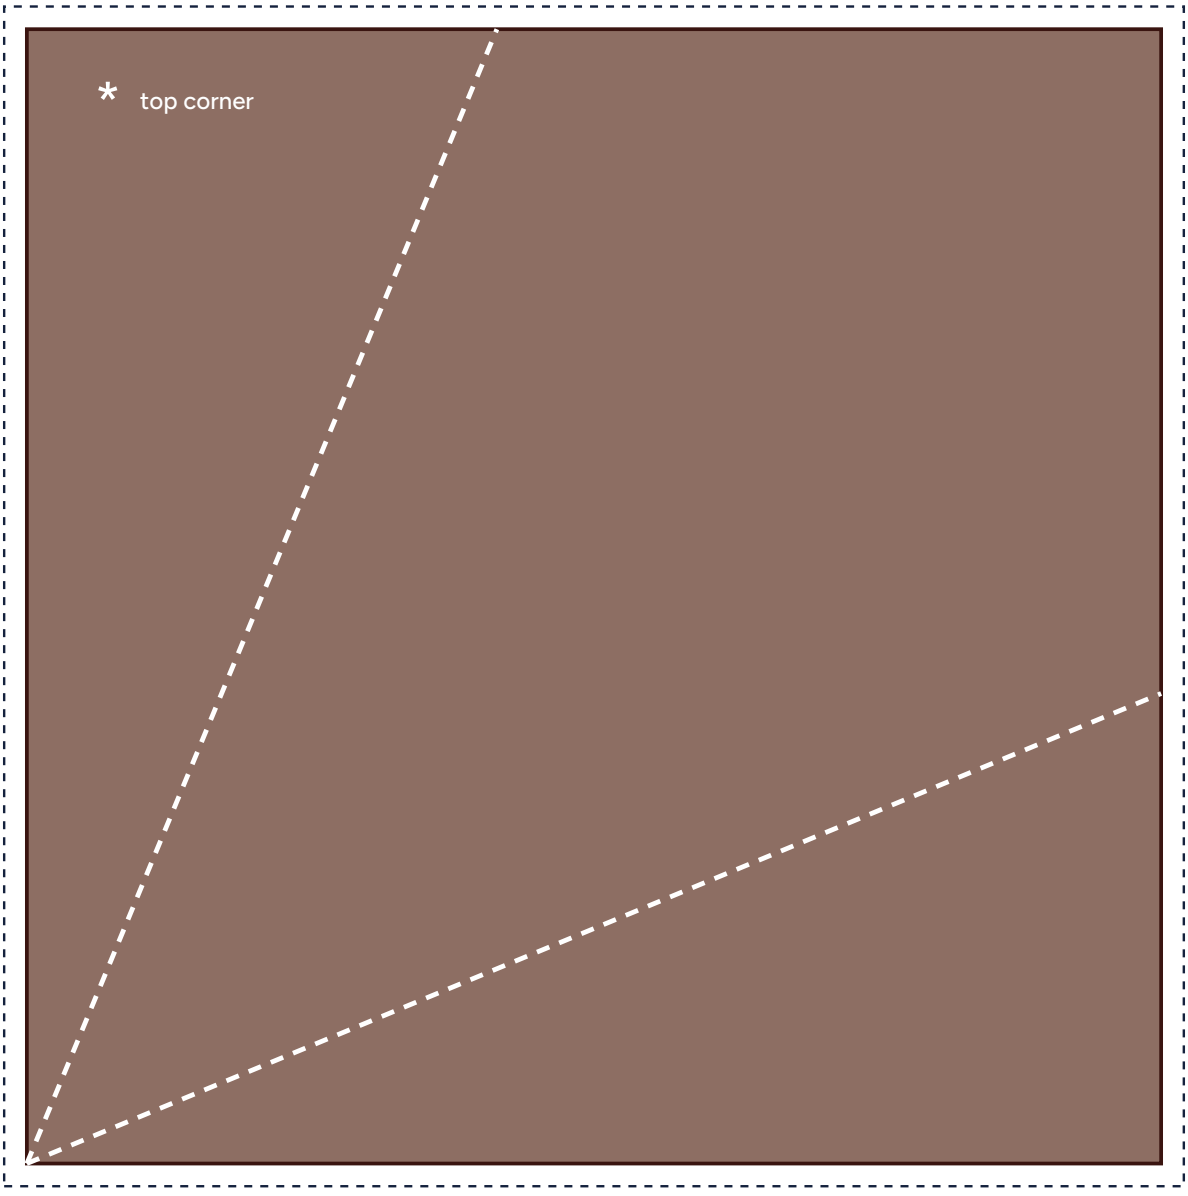

Marker 1: draw a round eye, and color a brown wing with feather lines.

Ready-to-fold turkey paper

Cut out the square along the dashed line. That is the only cutting. Start with the printed side up. Turn it so the corner marked with a star points up, like a diamond, then follow the steps. The dashed lines show your first fold.

Watch the folds

cut on the dashed line

Print at 100% (actual size). The square is 15 cm (6 in). The back is white.

Pieces for your turkey

Cut out each piece along the dashed line, with a grown-up helping. Glue it on where the step picture shows it. Print at 100% (actual size).

Watch the folds

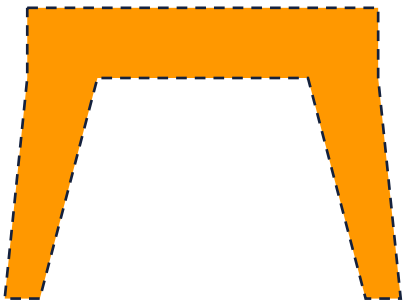

Beak

Wattle

Tail fan

Legs

Tip: a glue stick works best. Hold each piece for a few seconds.

Color your own turkey

Color the finished model and practise the drawn details here.
